AiM Infotech

Kit AiM Solo/SoloDL for BMWS 1000 RR
Installation guide

Release 1.00
Screw the rubber loose piece on the bolt inserting the distance piece.

Fix Solo bracket to the adapter bracket for BMW using the two countersunk screws.

Hook Solo to its bracket.

Fix Solo to its bracket using the screws you find on the rear of the same bracket.

Insert the loose piece in the handlebar hinge until the distance piece abuts the hinge.

Screw the central screw on the hinge so that this last grips and is well fixed.

If necessary unscrew and replace the brake liquid pan.
